8-in-1 film to digital converter. Purchased Summary: Now you can take all those stacks of 35mm (photo film & archive), 127, 126, 110, aps slides & negatives, regular 8mm and super 8 movies and convert them into digital JPEG images to share and preserve them forever. Wolverine has created a very simple to use device to convert all your film into 20 megapixels digital images in seconds. So simple to use, it only requires a push of a button. No computer or software is needed. Use it right out of the box to convert all your film by plugging it into an AC outlet or any USB port. All images are saved into its internal memory or direct to an optional SD/SDHC memory card. Easily connects to any Windows PC or Mac, to offload images or view on TV (HDMI TV cable not included).
